

EDA WAGYU BUYER'S GUIDE 2026

Antibiotic-free, hormone-free Japanese Black Wagyu

Direct from Miyazaki, Japan

— ABOUT US —

EDA LIVESTOCK

CO., LTD.

Founded in 2023 by **Tomoki Eda**, the 4th-generation successor of Eda Livestock — a 70-year cattle-farming heritage in Miyazaki, Japan.

We raise Japanese Black Wagyu using **circular feeding**, zero antibiotics, and complete farm-to-table traceability — pioneering the world's first organic-certified Wagyu beef.

"Not the rank, but how they're raised. We believe true quality comes from the feed, the care, and the methods behind the meat."

TOMOKI EDA

CEO · 4TH GENERATION REPRESENTATIVE

2023
FOUNDED

— WHY EDA WAGYU —

WHAT MAKES US DIFFERENT.

Unlike conventional Wagyu brands defined by **region** (Kobe, Matsusaka, Omi), Eda Wagyu is defined by **how the cattle are raised** — our feed and farming practices.

This means your customers get a consistent, transparent product with a story they can verify — not just a geographic label.

ONLY 1% OF JAPANESE FARMS ARE ADDITIVE-FREE

ANTIBIOTIC & HORMONE FREE

Zero antibiotics, growth promoters, or hormones throughout the entire lifecycle. Fully verifiable.

CIRCULAR FEED SYSTEM

Feed produced from our own compost cycle — not imported. Domestic feed in a yen-weak economy = structural cost advantage.

GRADE A3+ · 28 MONTHS+

Minimum A3 grade, 28+ months fattening. Grade and region specification available (region selection at premium).

WORLD'S ONLY ORGANIC WAGYU

Premium EdaWagyu holds JAS Organic + EU Leaf equivalence — the first and only certified organic Kuroge Wagyu in the world.

DIRECT EXPORT · JPY SETTLEMENT

No trading house intermediaries. Direct from farm, settled in Japanese Yen. Full traceability guaranteed.

SIX PRIMAL CUTS — CHILLED OR FROZEN, VACUUM-PACKED

All cuts available chilled (0–4°C) or frozen (–18°C). Vacuum-pack or skin-pack. Custom portioning on request.

👉 TAP A CUT FOR DETAILS

01

STRIPLOIN

BEST SELLER

サーロイン

Rich marbling in a fine web pattern. The king of steaks — ideal for Teppanyaki and fine dining.

03

TENDERLOIN / FILLET

PREMIUM

ヒレ / フィレ

Only ~3kg per head. The most tender cut — perfect for Chateaubriand.

05

TOMAHAWK

SHOWPIECE

トマホーク (骨付きリブロース)

Bone-in ribeye with long rib bone. A dramatic presentation cut for premium dining.

02

RIBEYE

POPULAR

リブロース / リブアイ

Generous marbling with buttery flavor. Excellent for roasting, steaks, and yakiniku.

04

ROUND (MOMO)

VERSATILE

モモ (ウチモモ・ランプ・イチボ)

Lean with concentrated umami. Versatile — roast, steak, shabu-shabu, or thin-sliced.

06

SKIN PACK PORTIONS

RETAIL READY

スキンパック (個包装)

Pre-portioned 150g–300g skin-pack. Retail-ready for high-end supermarkets and delis.

Japanese Beef Products Guide Book

Boasting a superior natural flavor,
Japanese beef is high-quality, tender and juicy.

Message from MAFF

Greetings

I would like to take this opportunity to thank you for your loyalty towards Japanese beef.

Wagyu is a breed of cattle unique to Japan and can also be said to be part of Japan's heritage. The unrivaled quality and taste of Wagyu has been recognized around the world, and exports are increasing in line with the recent Japanese cuisine boom.

This guidebook has been prepared in an effort to introduce cutting and slicing methods so to optimize the characteristic qualities of each cut, including cuts that were previously uncommon overseas, and for a range of dishes including barbecue and hot pot recipes.

I hope that this guidebook provides more opportunities to enjoy the great taste of Wagyu.

MAFF, Agricultural Production Bureau
Director-General: Kunio Naito

Wagyu – Refined by Japanese food culture

Including teppanyaki, sukiyaki and shabushabu, there is a wide variety of Japanese dishes that allow one to fully appreciate the tenderness and flavor of Wagyu. Teppanyaki is a simple method of drawing out the full flavor of the ingredients, while sukiyaki and shabushabu emphasize the delicate flavor and mouth-watering texture of thinly sliced beef. Japanese food culture places emphasis on enjoying the natural flavors of ingredients and has developed Wagyu into what it is today. Wagyu is unrivalled in its great taste and is now gaining popularity around the world as a luxury ingredient.

Bringing the great taste of globally acclaimed Wagyu to dinner tables worldwide

The tenderness and delicate flavor of Wagyu is in high demand in Japan, where cuisine honors the inherent flavor of the ingredients. In response to such demand, Japan has refined its production technologies and the rest of the world, which is more accustomed to slightly more textured red meat, has been taken by surprise by the texture of Wagyu - a new style beef that once tried will not soon be forgotten. Wagyu, a relatively rare commodity, has the potential to increase the possibilities and value of food cultures around the world and bring with it significant change.

Raised with loving care for perfect Wagyu

Each and every head of Wagyu cattle is given time and attention, and raised lovingly by feeding specialists in the vast open spaces of Japan. In addition to a well managed environment – a carefully designed diet including rice, hay, wheat, and bran to raise cattle that are both healthy and produce great tasting beef, and cattle sheds kept in immaculate condition so as not to stress the delicate cattle – Wagyu cattle are bred with human compassion and attention. Outstanding production technologies and the pride of the master in pursuit of perfect Wagyu gives way to a superior quality found nowhere else in the world.

The melt-in-your-mouth texture is unique to Wagyu

Perhaps the most prominent characteristic of Wagyu is the marbled fat distributed through the muscle fibers known as “shimofuri” in Japan. The fine texture of Wagyu gives an extremely tender, melt-in-the-mouth quality. Wagyu is also known for its sweet, full-bodied aroma known as “wagyuko” or beef aroma. When cooking, Wagyu is known to give off an aroma that is likened to coconut or fruit. This beef aroma serves to further draw out the great taste of Wagyu. The flavor of Wagyu does not only satisfy the taste buds, but all five senses and has the potential to significantly change beef cuisine in countries around the world.

The Wagyu brand is increasing in popularity all over the world

Authentic Japanese Wagyu comes sealed with the universal Wagyu mark

Wagyu is increasing in popularity all over the world. This mark is only given to authentic Japanese Wagyu and we hope that you use it as a guide to selecting high-quality, great tasting authentic Wagyu meat products. Try one of the authentic Wagyu products today.

What breeds of cattle produce Wagyu?

Only breeds that satisfy the following conditions can be accredited as Wagyu beef.

■ Breeds

1. Japanese Black Cattle
2. Japanese Brown Cattle
3. Japanese Shorthorn Cattle
4. Japanese Polled Cattle
5. Cross breeds resulting from interbreeding of 1.- 4. above
6. Cross breeds from the interbreeding of 1. - 5. or 5. above. Proof of the above must be able to be evidenced by means of a registration system in accordance with the Improvement and Increased Production of Livestock Act and through the cattle traceability system *.

* Japan has established a beef traceability system that provides production records of domestic cattle in Japan from the time they are born up until the time they reach the consumer.
Homepage Address: <https://www.id.nlb.go.jp/english/top.html>
For more information, please see p.45 and 46, "High-level Measures to Ensure Meat Safety", of the guidebook

■ Breeding environment

1. Must be cattle born and bred in Japan.
2. Ancestry of the cattle must be able to be confirmed by a traceability system.

High-grade Wagyu. Beef brands bred in specific regions of Japan.

Included under the category of Wagyu are beef brands that are extremely popular that have been bred using improved feeding methods and feed individually developed in specific regions throughout Japan. A large majority of these beef brands are given the name of the production area such as Matsuzaka Beef, Yonezawa Beef and Maesawa Beef.

Grading system to clearly identify meat yield and quality

To ensure fair trading, beef in Japan is currently graded by the Japan Meat Grading Association. Beef is graded based on the yield grade and meat quality. The yield grade refers to the ratio of meat to total weight of the carcass and is classified into three grades from A to C with A being a grade of higher yield. Meat quality is classified into five grades from 5 to 1 based on beef marbling, color and brightness of the meat, firmness and texture of the meat and color and brightness of the fat. The lowest of the four individual grades is the final grade allocated to the meat. A thorough grading system of 15 grades through a combination of the above two elements ensures a clear indication of Wagyu meat quality and yield grade.

■ Standard grades and how they are displayed <Example>

Yield Grade	Meat Quality Grade				
	5	4	3	2	1
A	A5	A4	A3	A2	A1
B	B5	B4	B3	B2	B1

Overview of Raw Meat

The chuck roll is the forequarter portion that is cut between the 6th and 7th rib perpendicular to the dorsal line excluding the shoulder clod and the brisket. It is divided into the chuck and the neck. The chuck roll can be well-marbled and the meat is tender and tasty making it perfect for sukiyaki and barbecuing.

Removing the neck

For the neck, see P.13

Cross-section between the 2/3 thoracic vertebrae: Marbling can be clearly seen in this cut and shows that it has been cut perpendicular to the muscle fiber.

Cross-section between the 7/1 cervical vertebrae: The point from which marbling starts is used as the partition line.

Cross-section between the 3/4 cervical vertebrae: Interface between the neck and chuck (May differ depending on standards)

Cross-section between the 4/5 thoracic vertebrae: The portion where inter-muscular fat is significant and the core of the chuck is smaller is used as the partition line.

Cross-section between the 6/7 thoracic vertebrae: Cross section between the chuck and the ribloin. The core of the loin is large with a proportionate balance of lean meat and fat.

Neck

Mince

Overview of Raw Meat

The fillet is located on the inside of the loin, contains practically no muscle and is characterized by its fine texture, tenderness and low fat content. It accounts for only 2% of the entire dressed carcass and it is a luxury item making it the most expensive cut of beef available. Care needs to be taken as the color of the meat degrades rapidly.

Overview of Raw Meat

The gooseneck round is the lean, well-muscled part of the round. The meat generally has a rough texture and is relatively tough. The gooseneck round is divided into three parts: eye of round, a cut that is paler in color and more elastic than other parts; the heel, a cut prepared for sale after removal of the M. flexor digitorum superficialis located in the center; and the outside round (gooseneck round) that is commonly used for stewing.

Overview of Raw Meat

The top-round consists of a large block with a proportionately large amount of lean meat. It has a cover of fat however very little underneath. Meat quality can vary from the outside, towards the gooseneck round to the inside, towards the knuckle. Towards the gooseneck round the meat contains proportionately more fat, however has a rough texture with slightly tough meat. On the other hand, meat towards the knuckle is characteristically tender.

Overview of Raw Meat

The D Rump can be divided into the sirloin butt that runs into the sirloin and the top sirloin cap that runs into the gooseneck round. The D Rump has a very attractive color, is lean, finely-textured and is characterized by the proportionate fat and tender quality. The top sirloin cap has a deep color and a strong flavor however it is important to pay attention to the direction of muscle fiber when cutting it for retail.

Overview of Raw Meat

The knuckle is spherically-shaped and consists primarily of lean meat. It consists of four parts: the inside knuckle muscle, slightly deep in color and tender; the knuckle main muscle that has muscle running into the center, is fine textured and tasty; the outside knuckle that is deep in color and slightly tough; and the tri-tip that has some marbling but is not as tender as would be expected from the appearance.

How to slice Wagyu to achieve maximum value

In addition to general cutting methods, there is a technique to slice Wagyu and optimize its fine texture and tenderness with a special slicer. Following are some guidelines to using the slicer and arranging the sliced meat effectively.

Slices and Off-cuts

Slices are thin slices taken from large blocks of one particular cut. Off-cuts are smaller pieces or slices from a combination of differing cuts and are used in accordance with the cooking method and the particular cut. Slices are ideally suited to dishes like shabu-shabu and sukiyaki while off-cuts are perfect for stewing. Off-cuts in particular produce a full-bodied flavor in just a short time making them convenient for use in quickly prepared meals such as stews.

Guidelines for arranging sliced meat

Point

Fold both the right and left sides inwards

Fold the top and bottom edges under the slice

Examples of effective arrangement

Guidelines to using the slicer

Setting cuts onto the slicer (Good Example)

Lean cuts and fatty cuts are placed alternately. This will help to achieve uniform cuts.

Seen from above:
The topmost front side of the meat will form the "face" of the product so it is best to use attractive looking cuts.

Setting cuts onto the slicer (Bad Example)

Lean cuts and fatty cuts are placed in groups. This will result in inconsistent lean and fatty cuts in the finished retail product.

Be careful not to try and slice too much meat at one time. The blocks in the photo to the left have also been placed with the muscle fibers sitting parallel to the blade. This will result in an unfavorable texture when eating. (The meat will be tough)
