抗生物質・ホルモン剤 完全不使用 国産黒毛和牛
宮崎県 江田畜産より直送

- 会社概要 -

EDA LIVESTOCK

江田畜産株式会社

2023年、**江田 友輝**（4代目）により設立。宮崎県・高原町にて約70年続く畜産業の伝統を継承。

循環型飼料・抗生物質ゼロ・完全トレーサビリティで黒毛和牛を育成。世界初の有機JAS認証和牛を実現したパイオニア。

「ランクではなく、どう育てたか。本物の品質は、餌・育て方・哲学から生まれる。」

江田 友輝

代表取締役・4代目

2023

設立

－ なぜ 江田和牛か －

他と違う理由。

従来の和牛ブランドは産地（神戸・松阪・近江）で定義されますが、江田和牛は**育て方**—— 飼料と農法 —— で定義されます。

産地ラベルだけではない、検証可能なストーリーと一貫した品質を、お客様にお届けします。

日本の畜産農家で 無添加飼育は たった 1%

抗生物質・ホルモン剤 不使用

生涯を通じ、抗生物質・成長促進剤・ホルモン剤は一切不使用。完全に検証可能です。

循環型飼料システム

自社コンポストから生まれた国産飼料を使用。輸入依存ゼロ。円安経済下でも構造的なコスト優位性を実現。

A3+ 等級・28か月以上

最低A3等級、28か月以上の肥育期間。等級・産地のご指定可能（特定産地ご希望は加算料金）。

世界唯一の オーガニック和牛

特選江田和牛は有機JAS + EU Leaf 同等認証を保有。世界初・唯一の認証オーガニック黒毛和牛。

直接輸出・日本円決済

商社を介さず、農場から直接輸出。日本円建てで決済。完全なトレーサビリティを保証。

6つの主要部位－チルド / 冷凍 真空パック対応

全部位、チルド（0～4℃）または冷凍（-18℃）でご提供可能。真空パック・スキンパック対応。カスタムカット相談可。

Japanese Beef Products Guide Book

Boasting a superior natural flavor,
Japanese beef is high-quality, tender and juicy.

Message from MAFF

Greetings

I would like to take this opportunity to thank you for your loyalty towards Japanese beef.

Wagyu is a breed of cattle unique to Japan and can also be said to be part of Japan's heritage. The unrivaled quality and taste of Wagyu has been recognized around the world, and exports are increasing in line with the recent Japanese cuisine boom.

This guidebook has been prepared in an effort to introduce cutting and slicing methods so to optimize the characteristic qualities of each cut, including cuts that were previously uncommon overseas, and for a range of dishes including barbecue and hot pot recipes.

I hope that this guidebook provides more opportunities to enjoy the great taste of Wagyu.

MAFF, Agricultural Production Bureau
Director-General: Kunio Naito

Wagyu – Refined by Japanese food culture

Including teppanyaki, sukiyaki and shabushabu, there is a wide variety of Japanese dishes that allow one to fully appreciate the tenderness and flavor of Wagyu. Teppanyaki is a simple method of drawing out the full flavor of the ingredients, while sukiyaki and shabushabu emphasize the delicate flavor and mouth-watering texture of thinly sliced beef. Japanese food culture places emphasis on enjoying the natural flavors of ingredients and has developed Wagyu into what it is today. Wagyu is unrivalled in its great taste and is now gaining popularity around the world as a luxury ingredient.

Bringing the great taste of globally acclaimed Wagyu to dinner tables worldwide

The tenderness and delicate flavor of Wagyu is in high demand in Japan, where cuisine honors the inherent flavor of the ingredients. In response to such demand, Japan has refined its production technologies and the rest of the world, which is more accustomed to slightly more textured red meat, has been taken by surprise by the texture of Wagyu - a new style beef that once tried will not soon be forgotten. Wagyu, a relatively rare commodity, has the potential to increase the possibilities and value of food cultures around the world and bring with it significant change.

Raised with loving care for perfect Wagyu

Each and every head of Wagyu cattle is given time and attention, and raised lovingly by feeding specialists in the vast open spaces of Japan. In addition to a well managed environment – a carefully designed diet including rice, hay, wheat, and bran to raise cattle that are both healthy and produce great tasting beef, and cattle sheds kept in immaculate condition so as not to stress the delicate cattle – Wagyu cattle are bred with human compassion and attention. Outstanding production technologies and the pride of the master in pursuit of perfect Wagyu gives way to a superior quality found nowhere else in the world.

The melt-in-your-mouth texture is unique to Wagyu

Perhaps the most prominent characteristic of Wagyu is the marbled fat distributed through the muscle fibers known as “shimofuri” in Japan. The fine texture of Wagyu gives an extremely tender, melt-in-the-mouth quality. Wagyu is also known for its sweet, full-bodied aroma known as “wagyuko” or beef aroma. When cooking, Wagyu is known to give off an aroma that is likened to coconut or fruit. This beef aroma serves to further draw out the great taste of Wagyu. The flavor of Wagyu does not only satisfy the taste buds, but all five senses and has the potential to significantly change beef cuisine in countries around the world.

The Wagyu brand is increasing in popularity all over the world

Authentic Japanese Wagyu comes sealed with the universal Wagyu mark

Wagyu is increasing in popularity all over the world. This mark is only given to authentic Japanese Wagyu and we hope that you use it as a guide to selecting high-quality, great tasting authentic Wagyu meat products. Try one of the authentic Wagyu products today.

What breeds of cattle produce Wagyu?

Only breeds that satisfy the following conditions can be accredited as Wagyu beef.

■Breeds

1. Japanese Black Cattle
2. Japanese Brown Cattle
3. Japanese Shorthorn Cattle
4. Japanese Polled Cattle
5. Cross breeds resulting from interbreeding of 1.- 4. above
6. Cross breeds from the interbreeding of 1. - 5. or 5. above. Proof of the above must be able to be evidenced by means of a registration system in accordance with the Improvement and Increased Production of Livestock Act and through the cattle traceability system *.

* Japan has established a beef traceability system that provides production records of domestic cattle in Japan from the time they are born up until the time they reach the consumer.
Homepage Address: <https://www.id.nlb.go.jp/english/top.html>
For more information, please see p.45 and 46, "High-level Measures to Ensure Meat Safety", of the guidebook

■Breeding environment

1. Must be cattle born and bred in Japan.
2. Ancestry of the cattle must be able to be confirmed by a traceability system.

High-grade Wagyu. Beef brands bred in specific regions of Japan.

Included under the category of Wagyu are beef brands that are extremely popular that have been bred using improved feeding methods and feed individually developed in specific regions throughout Japan. A large majority of these beef brands are given the name of the production area such as Matsuzaka Beef, Yonezawa Beef and Maesawa Beef.

Grading system to clearly identify meat yield and quality

To ensure fair trading, beef in Japan is currently graded by the Japan Meat Grading Association. Beef is graded based on the yield grade and meat quality. The yield grade refers to the ratio of meat to total weight of the carcass and is classified into three grades from A to C with A being a grade of higher yield. Meat quality is classified into five grades from 5 to 1 based on beef marbling, color and brightness of the meat, firmness and texture of the meat and color and brightness of the fat. The lowest of the four individual grades is the final grade allocated to the meat. A thorough grading system of 15 grades through a combination of the above two elements ensures a clear indication of Wagyu meat quality and yield grade.

■Standard grades and how they are displayed <Example>

Yield Grade	Meat Quality Grade				
	5	4	3	2	1
A	A5	A4	A3	A2	A1
B	B5	B4	B3	B2	B1
C	C5	C4	C3	C2	C1

Overview of Raw Meat

The chuck roll is the forequarter portion that is cut between the 6th and 7th rib perpendicular to the dorsal line excluding the shoulder clod and the brisket. It is divided into the chuck and the neck. The chuck roll can be well-marbled and the meat is tender and tasty making it perfect for sukiyaki and barbecuing.

Removing the neck

For the neck, see P.13

Cross-section between the 2/3 thoracic vertebrae: Marbling can be clearly seen in this cut and shows that it has been cut perpendicular to the muscle fiber.

Cross-section between the 7/1 cervical vertebrae: The point from which marbling starts is used as the partition line.

Cross-section between the 3/4 cervical vertebrae: Interface between the neck and chuck (May differ depending on standards)

Cross-section between the 4/5 thoracic vertebrae: The portion where inter-muscular fat is significant and the core of the chuck is smaller is used as the partition line.

Cross-section between the 6/7 thoracic vertebrae: Cross section between the chuck and the ribloin. The core of the loin is large with a proportionate balance of lean meat and fat.

Neck

RETAIL CUT

■ Cut A

This portion is closest to the neck. The meat is a little tough and fibrous however has a strong flavor with little fat. (high proportion of lean meat)

Overview of Raw Meat

The neck meat comes from the portion of the neck that is well-muscled. The meat is tough, rough-textured, and lean. The meat is also comprised of a large proportion of muscle tissue making it ideal for stewing. It can also be combined with other cuts for BBQ cuts and slices for stewing.

Mince

Overview of Raw Meat

The chuck tender is rare because only 2kg can be obtained from each animal. This is the part of the forequarter running from the forequarter to the shoulder clod however the meat is similar to round. The chuck tender is well marbled with a subtle, sweet taste that grows stronger the more it is chewed.

Culinary Applications

Mince

Overview of Raw Meat

The fillet is located on the inside of the loin, contains practically no muscle and is characterized by its fine texture, tenderness and low fat content. It accounts for only 2% of the entire dressed carcass and it is a luxury item making it the most expensive cut of beef available. Care needs to be taken as the color of the meat degrades rapidly.

Culinary Applications

Overview of Raw Meat

The gooseneck round is the lean, well-muscled part of the round. The meat generally has a rough texture and is relatively tough. The gooseneck round is divided into three parts: eye of round, a cut that is paler in color and more elastic than other parts; the heel, a cut prepared for sale after removal of the M. flexor digitorum superficialis located in the center; and the outside round (gooseneck round) that is commonly used for stewing.

Overview of Raw Meat

The top-round consists of a large block with a proportionately large amount of lean meat. It has a cover of fat however very little underneath. Meat quality can vary from the outside, towards the gooseneck round to the inside, towards the knuckle. Towards the gooseneck round the meat contains proportionately more fat, however has a rough texture with slightly tough meat. On the other hand, meat towards the knuckle is characteristically tender.

Overview of Raw Meat

The D Rump can be divided into the sirloin butt that runs into the sirloin and the top sirloin cap that runs into the gooseneck round. The D Rump has a very attractive color, is lean, finely-textured and is characterized by the proportionate fat and tender quality. The top sirloin cap has a deep color and a strong flavor however it is important to pay attention to the direction of muscle fiber when cutting it for retail.

Overview of Raw Meat

The knuckle is spherically-shaped and consists primarily of lean meat. It consists of four parts: the inside knuckle muscle, slightly deep in color and tender; the knuckle main muscle that has muscle running into the center, is fine textured and tasty; the outside knuckle that is deep in color and slightly tough; and the tri-tip that has some marbling but is not as tender as would be expected from the appearance.

How to slice Wagyu to achieve maximum value

In addition to general cutting methods, there is a technique to slice Wagyu and optimize its fine texture and tenderness with a special slicer. Following are some guidelines to using the slicer and arranging the sliced meat effectively.

Slices and Off-cuts

Slices are thin slices taken from large blocks of one particular cut. Off-cuts are smaller pieces or slices from a combination of differing cuts and are used in accordance with the cooking method and the particular cut. Slices are ideally suited to dishes like shabu-shabu and sukiyaki while off-cuts are perfect for stewing. Off-cuts in particular produce a full-bodied flavor in just a short time making them convenient for use in quickly prepared meals such as stews.

Guidelines for arranging sliced meat

Point

Fold both the right and left sides inwards

Fold the top and bottom edges under the slice

Examples of effective arrangement

Guidelines to using the slicer

Setting cuts onto the slicer (Good Example)

Lean cuts and fatty cuts are placed alternately. This will help to achieve uniform cuts.

Seen from above:
The topmost front side of the meat will form the "face" of the product so it is best to use attractive looking cuts.

Setting cuts onto the slicer (Bad Example)

Lean cuts and fatty cuts are placed in groups. This will result in inconsistent lean and fatty cuts in the finished retail product.

Be careful not to try and slice too much meat at one time. The blocks in the photo to the left have also been placed with the muscle fibers sitting parallel to the blade. This will result in an unfavorable texture when eating. (The meat will be tough)
